

Celebrate Bats!

Saturday, August 29, 2015

Schedule of Activities

10:00 am - 12:30 pm

Interactive Display Table

Stop by the Visitor Center to learn more about bats.

Researchers will be sharing bat information, current research projects, and answering questions concerning our flying friends.

10:00 am, 11:00 am, 1:00 pm, and 2:30 pm

Junior Ranger Nature Tracks

Fun activities for our young visitors, ages 6-12, to learn about bats. Meet at the Visitor Center.

7:00 pm - 9:00 pm

Showcasing Bat Research

Explore research stations set up between the Visitor Center and the Historic Entrance of Mammoth Cave. Watch bats exit from their day time roosts. Learn what, and how, bats eat and drink. Hear bat calls and see how those calls can be visually represented and interpreted. Use night vision goggles to see in the dark. Visualize the world in infra-red (FLIR). The adventure starts at the Visitor Center and extends 0.2 miles down a steep paved hill. Dress for the weather.

A warm jacket is advised for use at the cave entrance, especially for youth.

Weather may cancel some activities.
